

# **SPEED • POWER • RANGE** **MotorScrubber™** AIRCRAFT CLEANING SYSTEM

*Cleaning aircraft can be challenging and time-consuming work with ordinary tools.*

## **Use MotorScrubber elbow grease!**

- The MotorScrubber's powerful rotary scrub head is powered by a rechargeable 12-volt battery backpack. The backpack is lightweight (weighs only 6 lbs.), fully-adjustable, and provides up to 4 hours of "start & stop" use on a single charge.
- The lightweight (3 lbs.), 48" long-handle MotorScrubber telescopes to 8.5 ft. for an incredible 13 ft. reach.
- The scrubber head swivels from 0° to 70° and can be locked into position.
- Interchangeable brushes can be quickly and easily switched with a twist of the wrist.

## **Cleans everywhere and anywhere!**

- De-bugs leading edges ... wings, struts, spinners, gear, fairings, lights, etc.
- Cleans all those hard-to-reach spots ... fins, underbelly, wings, steps, cabin, etc.
- Safe to use around water and in inclement weather (12-volt battery-powered scrub head is completely immersible in water)

## **An affordable, must-have tool!**

- The MotorScrubber starter kit includes the scrub head & handle, backpack & battery, 5 ft. coil cord, padholder, battery charger, complete operating instructions, and 12-month warranty.
- A full line of MotorScrubber accessory brushes & power adapters are also available.

*Keep your maintenance operations flying with the MotorScrubber Aircraft Cleaning System!*
